dcTrack[®] – DCIM Operations Software

DCIM Operations Software Easily Manage Data Center Assets, Changes, and Capacity

Capacity Management

- Available power, space, cooling, network ports and power connectors
- Search, place, and reserve capacity
- Find stranded power, space, and cooling capacity

Change Management

- Workflow for change requests
- Request approvals, status, and history
 Connect to ticketing and CMDB systems

Asset Management

- All data center physical resources and logical connections
- Maintenance/lease information
- Unlimited Custom Fields
- Models Library with over 30,000 smart models across 450 manufacturers

Connectivity

- Build power and data circuits, including structured cabling
- Visual trace routes of power and network paths
- Validation for physical connections and media types

Visualization

- 3D color-coded, floor map overlays show power, cooling, and capacity data
- Drilldown from floor map view to contents inside cabinets
- Thermal and pressure maps with time-lapse video

BI & Analytics

- Over 60 preconfigured chart widgets
- Filter, print, and export raw data to CSV and PDF
- Support for custom SQL and HTML widgets

⁶⁶With DCIM software we now have an up-to-minute picture of capacities in all our data centers in terms of power, space, networking and cooling.⁹⁹

Joseph Keena | Manager of Data Center Operations , **UF Health Shands** Providing easy access to real-time information about critical facilities, networks, and IT assets by removing the complexity and dependency on emails and spreadsheets, dcTrack DCIM Operations solution transforms the delivery of data center services. Featuring detailed information and visual mappings, dcTrack's solution helps data center operators handle their most common tasks and processes faster and more efficiently than ever before, while saving costs and improving availability.

Detailed data center business intelligence and analytics about your infrastructure and visual mappings help you manage placement of your IT equipment, make informed capacity management decisions, and keep track of your data center assets.

When integrated with a CMDB or change management system for workflow functionality, dcTrack provides fast ROI, especially during any data center relocation, consolidation, or new build project. dcTrack can be easily deployed as a standalone DCIM operations solution or with Sunbird's Power IQ® DCIM Monitoring Software for power, energy, environment, and cabinet security monitoring.

Sophisticated Visualization, Analysis and Reporting

- Easily analyze KPIs and gain data center business insights from over 60 chart widgets with drilldown across multiple dashboards that address your most common reporting use cases
- Preconfigured dashboards display charts by category: Enterprise Overview, Enterprise Health, What-If, Inventory, Space, Power, Cooling, Connectivity, Change, Tabular Reports, and DCOI
- Drilldown capability allows easy access to the data that drives your charts
- Visualize floor plan drawings and rack elevations in real time

Capacity Management for Optimized, Intelligent Planning

- Easily see real-time capacity for all your data center physical infrastructure
- Rich filtering allows quick search by several asset parameters
- Project-based reservations to support what-if capacity analysis
- Replace several inaccurate Excel® and Visio® files and trips to the data center

Asset Management for Accurate Inventory and Model Data

- Easily search for and reserve space, power and network connectivity for all IT assets
- Quickly locate server, network, and storage equipment
- Track detailed information on data center IT equipment
- Trace physical and logical relationships between equipment

Change Management to Move, Add, and Delete IT Equipment

- Create request and work orders with customizable task details and deadlines to ensure work is done accurately and on time
- Use role-based, granular permissions to ensure compliance with corporate requirements
- Enforce best practices workflow and meet ITIL framework guidelines
- Track the real-time status of all work activities and improve the productivity and efficiency of data center operations staff

dcTrack[®] — DCIM Operations Software

Enterprise Health Dashboard

Provide an at-a-glance view of the health and capacity of your global footprint with the ability to click to drill down to obtain details at the floor, room, pod, row, cabinet, and device levels. Set thresholds and receive alerts for critical- and warning-level events in your data center.

Stranded Power Capacity Chart

Easily find your available and stranded power capacity by correlating real-time measured load and planning information. Save on capital expenditures by using stranded power capacity, which will enable you to confidentially defer new cabinet buildouts.

Smart Floor Map

Get a complete view of your data center power, space, and cooling capacities. Easily spot problem areas at-a-glance or dive deeper with the ability to drill down for more details and to generate reports by customer, function, or group.

Capacity Management Dashboard

Provides real-time resource utilization data for better electrical, cooling, floor, cabinet, cable and network capacity planning. Quickly see how much capacity you're using and, more importantly, how much is available.

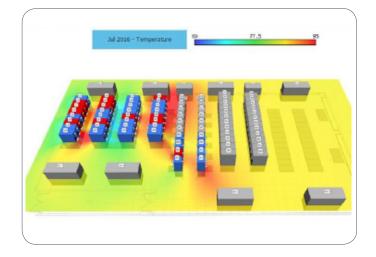

dcTrack[®] – DCIM Operations Software

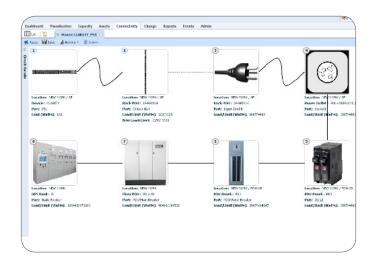

Thermal/Pressure Map Time-Lapse Video

Like weather radar for your data center. Easily spot hot spots and air pressure trends across multiple planes. Floor map overlays display temperature and pressure changes based on user-defined time periods so you can save money and address issues before they become problems.

Complete Power Chain Management

See power at every connection point in the power chain from the UPS to the device power supply with (N) or (N+1) redundancy. Achieve a balanced load across all three phases using derated values and actual readings so you'll never blow a breaker.

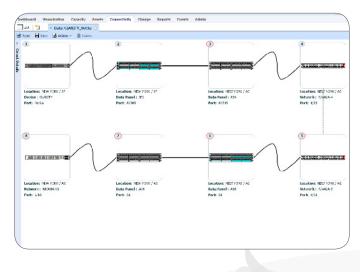

3D Visualization of Cabinets and Rows

Visualize cabinet and row elevations as if you are standing in front of them. Easily see cabinet contents including name, make, model and status. Monitor user configurable thresholds for space, power and cooling with ability to see near real-time readings for power, temperature, and humidity.

Network Connectivity and Cabling

View end-to-end network connectivity. Manage real-world cable infrastructure and labeling scenarios, with support for various design architectures and all known cable types, connectors, and topologies.

dcTrack[®] — DCIM Operations Software

Easy to Deploy and Use

- Application software, database, and hardened Linux® operating system are fully tested and ready to load on your VMware® platform
- Includes application software, database and operating system—all in a single file
- Web-based access and cloning tools simplify setup and administration
- Import wizards, customer specific model library, and auto-discovery tools accelerate implementations
- Support for multi-tenancy

A Complete Solution with Training and Support

- Pay-as-you-grow, rack-based license model results in superior customer value
- Software maintenance plans include documentation, training videos, Models Library updates, and software upgrades
- Implementation and training services available

Open Data Model

- Open database connectivity capabilities let you use your existing data warehouse and reporting system to generate custom reports
- APIs enable Asset Item create, read, update and delete to/from configuration management databases (CMDB) for seamless information exchange
- APIs enable seamless integration with change ticket and ITSM systems, including BMC Remedy v9.1

Quickly find space, power and network connectivity for IT devices, simplifying capacity planning and change management. Reserve capacity for future provisioning of new IT equipment.

Mobile Application

Anywhere, anytime access with your choice of smart phone or tablet, Apple and Android platforms, to enable paper-less audit. Create, read, update and delete items via mobile device. Scan a cabinet bar code and view its full configuration. Identify missing items, audit time stamp and auditor credentials.

Sunbird Software is changing the way data centers are being managed. With a focus on real user scenarios for real customer problems, we help data center operators manage tasks and processes faster and more efficiently than ever before, while saving costs and improving availability. We strive to eliminate the complexity they have been forced to accept from point tools and home grown applications, removing the dependency on emails and spreadsheets to transform the delivery of data center services. Sunbird delivers on this commitment with unexpected simplicity through products that are easy to find, buy, deploy, use, and maintain. Our solutions are rooted in our deep connections with our customers who share best practices and participate in our user groups and product development process.

Based in Somerset, NJ, Sunbird serves nearly 1,000 DCIM customers worldwide. For more information, please visit SunbirdDCIM.com.
